

Tronix Power-on-Delay USER'S MANUAL

Brownouts, power failures and severe voltage fluctuations can damage electronic appliances. Preventing this damage can be done by **Tronix Power-on-Delay**.

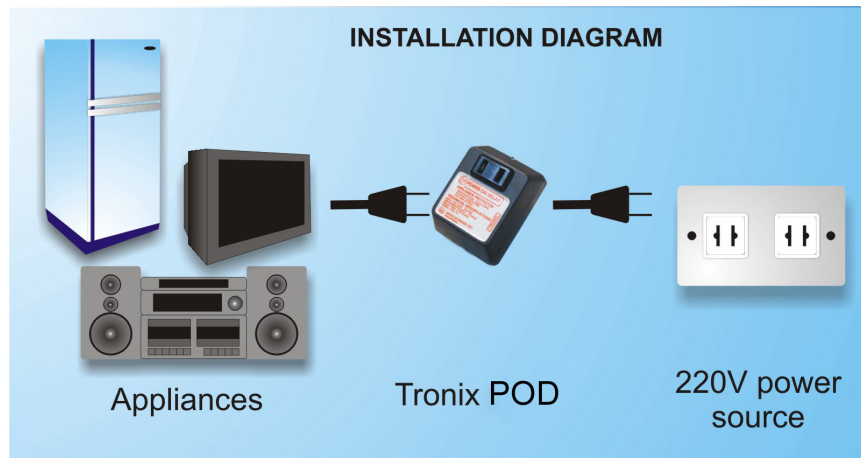

Tronix Power-on-Delay is a device that can protect home and office appliances by delaying electrical connection until the power stabilizes. The POD also provides the necessary protection against brownouts of very short duration. In addition, appliances with compressors need at least two (2) minutes for their pressure to equalize.

This device is ideal for refrigerators, freezers, television sets, audio systems, computers and fax machines.

I. INSTALLATION PROCEDURE:

- 1) Check the appliance current rating if the Power-on-Delay will be ideal for the appliance.
- 2) Insert the appliance power cord into the POD then the POD to the 220V outlet.
- 3) Turn on the appliance, wait for five (5) minutes before the appliance will power on.

NOTE: The delay can be more than 5 minutes the first time the unit is used.

II. TECHNICAL SPECIFICATIONS:

Input Voltage:	220VAC
Time Delay:	4 – 6 minutes
Maximum Load:	2000 Volt-Amp
Dimension:	(L)-7 cm x (W)-5 cm x (T)-6 cm (L)-2.76" x (W)-1.97" x (T)-2.36"

III. PRODUCT WARRANTY STATEMENT

The **Tronix Power-on-Delay** is covered by a one year-warranty. Within this period, Innovatronix, Inc. will repair the item at no charge or if necessary replace defective parts. The warranty only covers failures due to manufacturing defects and workmanship; hence, breakdown of the unit due to gross abuse is not covered by the warranty.

This limited warranty extends only to the original consumer and is not transferable. Warranty registration is not required. Warranty is applicable if and only if the product is completely and correctly assembled, the product is used under normal conditions for its intended purpose, and received all necessary maintenance.

Parts and models are subject to change without prior notice.
