

tronix

# Automatic NightLight

- ✓ Automatically turns on at dusk & off at dawn
- ✓ Easy positioning with spring-loaded pin
- ✓ For CFL / LED lamps up to 80 watts

Specially-designed for CFL / LED, heavy duty sensor switch

## Automatic ON/OFF

This heavy duty sensor switch automatically turns the CFL / LED ON during nighttime and turns OFF during daytime. It uses a light sensitive sensor about 5mm in diameter. It is fully capable of rotating in any direction, making it very easy to use.

## HEAVY DUTY

tronix

# Automatic NightLight

### Technical Specifications

Input Voltage	: 220/110VAC
Max Power (Load)	: 80 Watts
Dimension	: 85mm(L) & 38mm(Ø)
Net weight	: 46 grams

### Important Notes

1. The exact time that the unit will switch on or off will depend on the position of your sensor
2. The sensor must be pointed at the direction of the natural light
3. Pointing the sensor away from the natural light source can result to a prolonged ON & OFF switching of the unit
4. CFL / LED may flicker if unit is not adjusted correctly

Not applicable for Recessed Luminaire / Pin Lights

Don't forget to adjust.

### Installation Procedure

Securely install the CFL / LED into the Tronix ANL. Place the Tronix ANL into the light fixture. Make sure that the sensor faces the direction of the natural light. For indoor and outdoor use.
